In an era of unprecedented change--rapid urbanization, economic growth, and political revolution--European artists from 1700-1830 were in the business of finding new ways of making, selling, and talking about art. Matthew Craske creates a totally new and vivid record of eighteenth- and early nineteenth-century art in Europe, taking a critical view of such conventional categories as the "rococo," the "neo-classical," and the "romantic." He goes on to explore crucial thematic issues, such as changes in "taste" and manners, and the impact of enlightenment notions of progress, and at the same time goes well beyond the usual geographic limits of surveys to include St. Petersburg, Copenhagen, Warsaw, and Madrid. The result is a refreshingly holistic text which sets the art of the period firmly in its social history.

An excellent art history book

By A Customer

I bought this for an art history course in college. The book has many high quality illustrations and half of them are in color. The book also features many details of the works presented in it. There are also comments about what was happening in the artists' lives when they were painting the works shown. The book also includes the political events that occurred during the 18th and early 19th centuries. There is even a timeline in the back which shows what was happening in the art world and in the political world at the same time. The book focuses on the Rococo, Neo-Classical, and Romantic movements in painting and sculpture. There is no mention of architecture. This is a great book to have if you like art history.

Good Historical Overview

By Ilania Abileah

A good addition to your Art Book Library. Good analysis of art in the 18th and early 19th centuries, in conjunction with world events.

Academic indulgence

By Tom S

Somehow Craske has managed to find the most bland and lifeless art from this period in art history. He does love his caricatures and monkey paintings. Had I no experience of the subject other than this book I probably would not dig any deeper; thankfully that is not the case.
